

UltraAV Active DisplayPort to DVI Single-Link Adapters

The UltraAV® Active DisplayPort to DVI Single-Link adapter and Mini DisplayPort to DVI Single-Link adapter features a protocol converter that accepts a single-mode DisplayPort output from your video source, such as a PC or laptop computer. Using your DVI cable, simply connect the DisplayPort adapter to a DVI monitor or projector, no USB power or external power required.

The adapters work with all DVI-D single-link monitors, displays and projectors, supporting a display resolution of up to WUXGA (1920x1200) at 8 bits of color per component. The UltraAV adapters offers user friendly and seamless conversion between a Mini DisplayPort or DisplayPort graphic source and a DVI display device.

Features

- Connect a Single-Mode DisplayPort or Mini DisplayPort Enabled Computer to a DVI-D Monitor
- Active Adapter Protocol Converter Converts a Single-Mode DisplayPort Signal to Single-Link DVI
- Supports TV Resolutions of up to 1080p and up to 1920x1200 (reduced blanking) for Computers
- Sends Extended Colors up to 8-Bits per Component for Millions of Colors
- Features a Self-Powered Design, No External Power is Needed
