

USB-C to DisplayPort Cable

The Accell USB-C to DisplayPort cable can transmit high-definition video and audio from your USB-C (also known as Type-C) host computer to a DisplayPort enabled monitor. This USB-C to DisplayPort cable supports HD display resolutions including 3840×2160 @ 60Hz easily converting a USB-C port into a DisplayPort output.

Supports up to 4K Resolution

The USB-C to DisplayPort cable supports HD resolutions of up to 4K @ 60Hz for a clear, sharp picture. Use the cable to play games, view video or browse the internet from your USB-C enabled device on a large screen TV. Supporting multi-channel audio, the cable provides high-definition digital audio and video.

All Operating Systems Compatible

The USB-C to DisplayPort cable supports all USB-C devices with DisplayPort ALT mode and all operating systems, including Mac, Windows and Google. For this USB-C to DisplayPort cable to work from a USB-C port, the USB-C port must support DisplayPort Alternate (ALT) mode. Please check your device's user manual to confirm the abilities of its USB-C port.
